

Love It, Leave it: iterating with prototypes

Use this tool to help you evaluate your prototype , working in a group decide whether you need to keep it just the same, give up, make some adaptations or find an alternative solution. You could use it like this:

1. Ask everyone to mark which features they love etc on the matrix
2. Discuss responses as a group
3. Ask everyone to mark on the matrix their final view about how you should/ should not take the prototype forward
